

INTRODUCTION

EvolV is an ERC-20 token and smart contract equipped with a built-in decentralized exchange, which handles buying and selling of the token. The EvolV Ecosystem includes built-in referral dividends and volume based staking dividends for all token holders, along with use cases that give the EvolV token true utility.

The EvolV Ecosystem is built around the concept of volume backed basic income, paid in Ethereum to all EvolV holders.

It's a complex system, but it's all managed by an immutable smart contract.

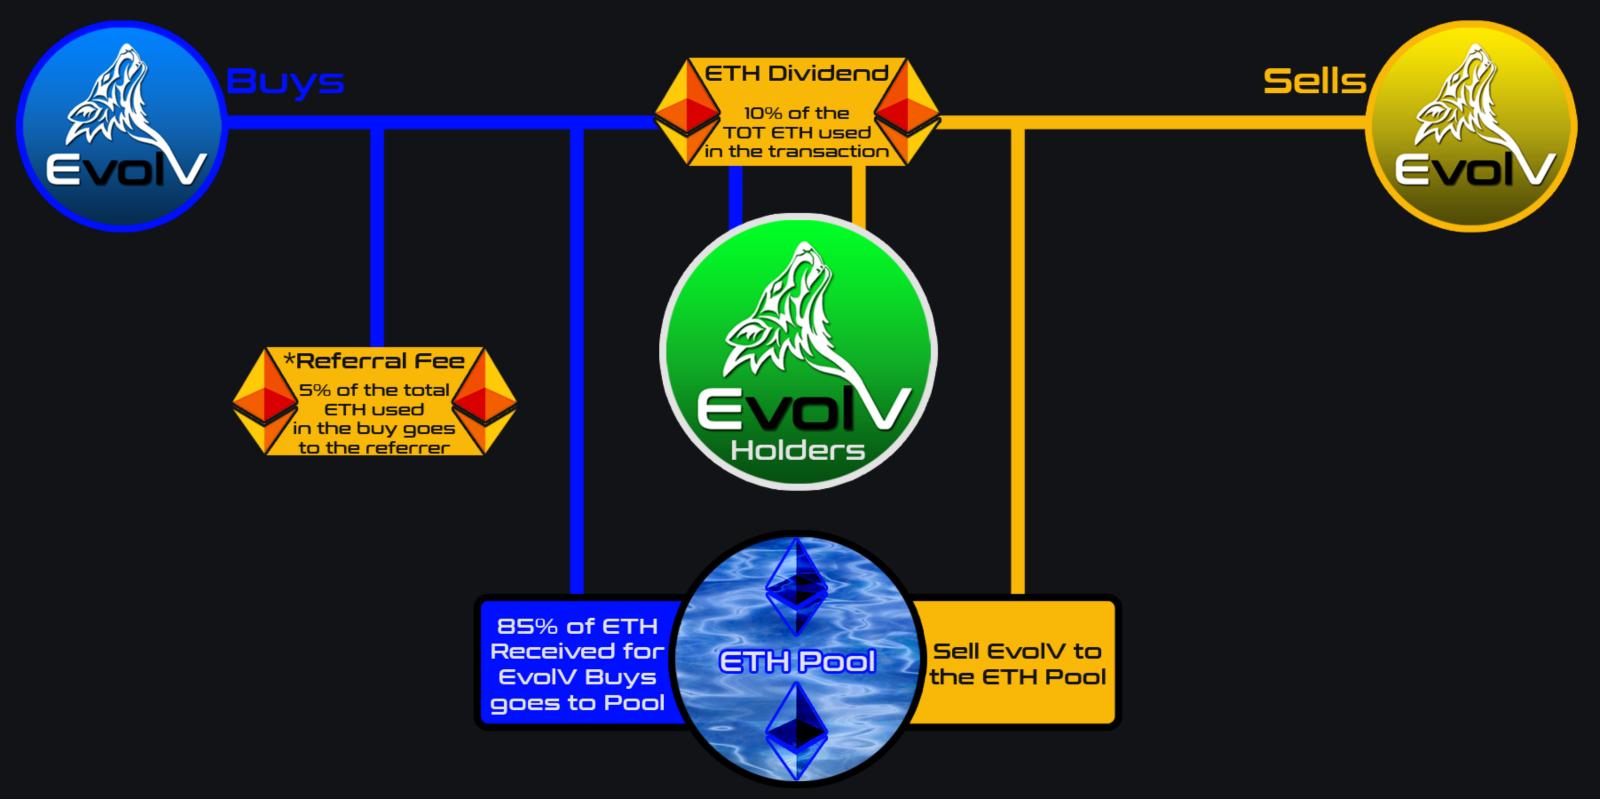

You will receive an **immediate 5% Ethereum** dividend anytime EvolV is purchased using your unique referral link.

Every time EvolV is purchased, you receive an Ethereum dividend.

Every time EvolV is sold, you receive an Ethereum dividend.

Ethereum in, Ethereum out. Easy as pie.

EvolV Ecosystem

EVOLV & BASIC INCOME

VOLUME BACKED BASIC INCOME THAT WORKS

The Basic Income concept has a long history which can be traced through a variety of important historical voices, including civil rights leader Dr. Martin Luther King, Jr., economist Milton Friedman, and United States Founding Father and philosopher, Thomas Paine.

Cryptocurrency has a role to play in bringing this humanity empowering idea to life. In our model, each EvolV token is equal to one share of EvolV citizenship. Ethereum dividends are distributed evenly across EvolV tokens each time there's a buy or sell. The EvolV Ecosystem is a volume backed basic income ecosystem that incorporates a 15% value added tax on all EvolV buys, and a 10% value added tax on all EvolV sells.

Each time that EvolV is bought or sold through the smart contract internal exchange via wolfpackbot.com, this tax will be distributed as a dividend payment in Ethereum to all of the holders of the EvolV token based on the number of EvolV tokens that each EvolV user holds, creating a sustainable source of liquid cryptocurrency income for as long as people buy, sell, trade, or use EvolV to purchase EvolV or WolfpackBOT products and services.

EVOLV SMART CONTRACT IMMUTABLE AND SECURE

A smart contract is a set-in-stone piece of programming language that is submitted to the Ethereum network upon a token's launch. The smart contract handles all the Ethereum and tokens autonomously without any form of human involvement, with calculations and functions being confirmed across thousands of computers before they are run.

EvolV is an ERC-20 token that can be bought and sold through the smart contract's internal excange via WolfpackBOT.com. Every time EvolV is bought or sold through the internal exchange via WolfpackBOT.com, the corresponding value added tax will be disbursed across all of the EvolV tokens.

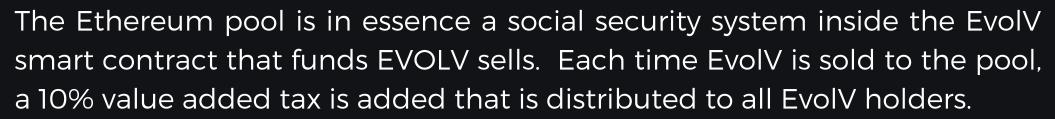

The price of EvolV will increase by 0.000000001 ETH for each EvolV token purchased...

The price of EvolV will decrease by 0.00000001 ETH for each EvolV token sold.

The price is frozen for the user at the time of each transaction, with a 10 percent tariff being collected and distributed—in Ethereum--across all of the tokens.

Each purchase will also include a referral fee of 5% which will be paid directly to the referrer!

EVOLV ETHEREUM POOLETHEREUM BACKED SOCIAL SECURITY

The Ethereum Pool funds the EvolV "social security" system.

All Ethereum received for EvolV purchases as well as a staggered percentage of funding received for WolfpackBOT subscriptions will fund the Ethereum pool.

The percentage of revenue from WolfpackBOT subscriptions that the WolfpackBOT/EvolV team uses to purchase EvolV will be based on how much funding is in the pool.

*Percentages for EvolV purchases from WolfpackBOT subscription revenue are:

- 10% when the pool funding is above 500 ETH
- 25% when the pool funding is between 200 and 500 ETH
- 50% when the pool funding is below 200 ETH
 *Subject to change

RECEIVING ETHEREUM DIVIDENDS

THE EVOLV TRADING GAME

EvolV is a trading game. Just as with traditional trading, those who think strategically will win. Those who let their emotions get the better of them will lose every time. The goal of the game is to collect more EvolV and receive more Ethereum dividends.

One of the biggest risks you will face is the temptation to panic sell.

Evolv is a gamified cryptocurrency ecosystem, with each buy order increasing the price of the token, and each sell order decreasing the price. If a lot of people sell their EvolV tokens all at once, you could see the price of the token take a huge dive. That being said, if you're strategic, and you hold onto your tokens, you will also receive Ethereum dividends from the sells all the way down. At that point, you can buy up more EvolV on the cheap, and receive more dividends on the climb back up. Not a bad deal, eh?

WITHDRAWING ETHEREUM DIVIDENDS

DIVIDEND WITHDRAW RULES

There is absolutely no upper limit to the amount of Ethereum dividends you can withdraw in a given time; HOWEVER, you must withdraw at least \$5 in Ethereum each time there is a withdraw transaction. This is so that you don't lose your dividends to transaction fees.

EVOLV UTILITYAN ECOSYSTEM WITH TRUE SYNERGY & UTILITY

In addition to being its own volume backed basic income system, EvolV will also serve as a method of payment for ALL future WolfpackBOT and EvolV products and services.

EvolV can be sent for WolfpackBOT credit so that it can be used as a form of payment for WolfpackBOT Crypto currency Trading Software subscriptions.

Additionally, EvolV will also be accepted as a form of payment for:

- The upcoming Wolfpack Trading Academy
 - 50% of WolfpackBOT Trading Academy revenue will also go toward funding the Ethereum pool (subject to change)
- The Wolfpack VIP Club
 - Includes Exclusive WolfpackBOT Beta Access
 - Exclusive insider strategy discussions
 - Early access to new WolfpackBOT strategies
- EvolV and WolfpackBOT promotional merchandise
- Any future Wolfpack/EvolV products and services
- As the EvolV Ecosystem expands, each additional use case will bring more EvolV purchases, leading to more Ethereum dividends being paid out

These use cases bring true synergy and utility to the EvolV ecosystem, helping to build volume and ensure a steady stream of Ethereum dividends for all Evolv holders.

EVOLV UTILITY VISUAL GUIDE

EVOLV MINT AND BURN PROGRAM KEEPING IT BALANCED

- EvolV is minted automatically upon purchase.
- Each time EvolV is sold, 100% of the EvolV amount sold is automatically burned.

This continuous "mint and burn" process keeps the circulating supply relatively balanced, increasing the amount of Ethereum dividends paid out to all EvolV holders.

EVOLV REFERRAL PROGRAMA GRASSROOTS COMMUNITY APPROACH

The EvolV Ecosystem is engineered to thrive on active community support and involvement; therefore, we are implementing a very generous referral program.

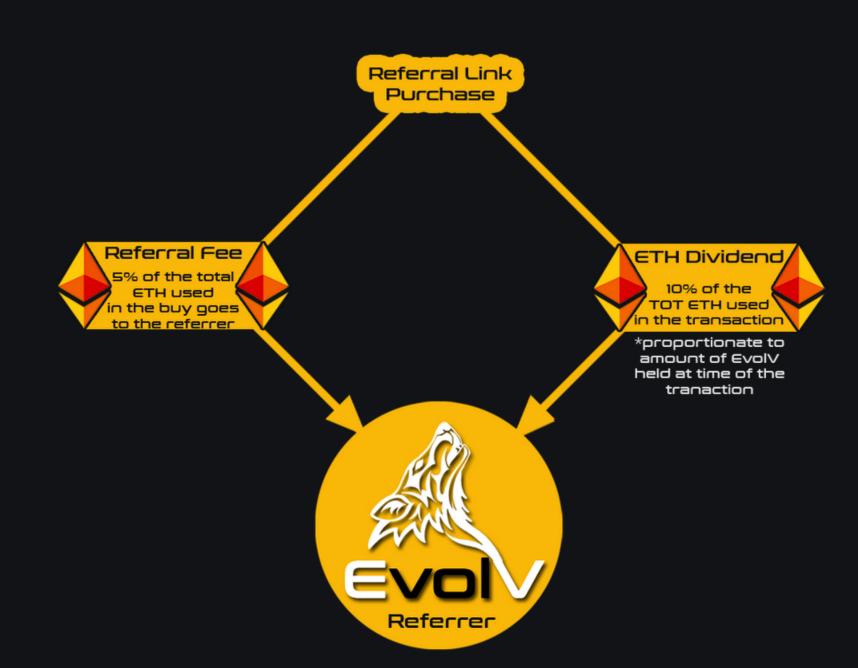

5% of each EvolV referral purchase will be paid directly to the referrer in Ethereum. That's right, each time someone joins the EvolV Ecosystem using your referral link, you will receive 5% of every EvolV purchase that they make—paid in Ethereum, FOREVER!

In other words, each time your referee makes a purchase, you as the referrer will receive a 5% referral bonus paid directly in Ethereum to your account.

To help you spread the word and earn more referrals we will be sponsoring frequent contests, rewarding winners in EvolV, free WolfpackBOT subscriptions, and other cool prizes!

We will also continue to support our very active Telegram and Discord communities, keeping you up to date with all the latest news and providing an active community of EvolV and WolfpackBOT users.

We're all in this together!
